## ENVIRONMENTAL POLICY

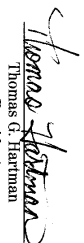

January 12, 1999

Autoiv ASP shall accomplish its main objective of developing, producing, and marketing automotive safety products, while conducting its business in an environmentally responsible manner. This means that Autoiv ASP shall plan and implement its business decisions in a manner that gives due consideration to the natural environment of its employees, its customers, and the communities and countries where it operates.

Specific Autoiv ASP actions shall include:

- Considering the laws and directives in each country as minimum requirements. Constructive dialogue with environmental authorities and other concerned parties will be maintained.
- Compliance with relevant environmental legislation and regulations, and with other requirements to which the organization subscribes.
- Establishing appropriate environmental management systems which shall be considered in response to new research and the latest findings.
- Conducting environmental activities in a proactive manner aimed at prevention of pollution, waste minimization and continual improvement. The use of non hazardous or less hazardous materials shall be promoted. Environmental aspects will be identified. Environmental objectives and targets will be established and monitored to assure continual improvement.
- Ensuring that this environmental policy is implemented and maintained and communicated to all employees.
- Influencing suppliers and sub-contractors to apply the principles of this environmental policy.
- Conducting regular reviews of this policy and making sure it is available to the public.

  
Brady J. Murry  
President  
Autoiv North America

  
Thomas G. Hartman  
President  
Autoiv Inflators
